| Steward(s) Dec2011: | yes |
| Petroleum & Natural Gas Surface Access Aug2002: | Conditional |
| Day Use Site(s): | Hoadley |
| Recreation Activities: | none noted |

Access:

Notes: Hoadley Natural area encompasses a glacial meltwater channel now occupied by Lloyd Creek. Vegetation includes black spruce-larch-Sphagnum wetlands and upland aspen & balsam poplar forest; good wildlife habitat.

This site lies in the Boreal Forest Natural Region, Dry Mixedwood Sub-region. The Dry Mixedwood Sub-region is the only Boreal Forest sub-region that does not have excellent representation within Alberta's parks and protected areas network. There are still significant shortfalls in the glacial lakebed, ground moraine, sandplain and sand dune natural history themes. Listed in "Other Natural Areas" (Alberta Parks web site, 2012).
