**Access:**

**Notes:** Isle Lake Natural Area contains reed-grass wetlands near the lake shore; tamarack stands; tamarack-black spruce/Labrador tea/peatmoss muskeg; alder-birch shrubland; and upland mesic forests of balsam fir, aspen, balsam poplar & white spruce.

This site lies in the Boreal Forest Natural Region, Dry Mixedwood Sub-region. The Dry Mixedwood Sub-region is the only Boreal Forest sub-region that does not have excellent representation within Alberta's parks and protected areas network. There are still significant shortfalls in the glacial lakebed, ground moraine, sandplain and sand dune natural history themes. Listed in "Other Natural Areas" (Alberta Parks web site, 2012).
