**Access:**

**Notes:** Majeau Lake Natural Area has slightly undulating topography with upland aspen-balsam poplar forest, black spruce/Labrador tea peatland, willow shrubland (along the stream), and an old open field that is reverting to shrubland & aspen forest.

This site is in the Boreal Forest Natural Region, Dry Mixedwood Sub-region. The Dry Mixedwood Sub-region is the only Boreal Forest sub-region that does not have excellent representation within Alberta's parks and protected areas network. There are still significant shortfalls in the glacial lakebed, ground moraine, sandplain and sand dune natural history themes. Listed in "Other Natural Areas" (Alberta Parks web site, 2012).
